Data Vintage

The Data Vintage is a stamp assigned with each new data update of the website. The stamp shows where the data currently comes from, including number of members from each data submitter (health insurance plan), and any special conditions related to the data.

This release of CO APCD data has split data vintage information. If you are looking at the State Costs & Utilization information, the data vintage reflects COAPCDQ42015. If you are using the Medical Service Prices, the data vintage reflects COAPCDQ42013.

COAPCDQ42015:

Claims submitted for service dates Jan 2011 - Dec 2014

Only include members covered by payers outlined below who live in Colorado

Claims will include at least "runout" of 3 months, providing enough time for providers to have most claims processed through payment systems

Note that data related to substance abuse claims is NOT part of the CO APCD

Payer Families or Company names are displayed, not the individual health plans offered

*Insurance coverage does not necessarily last for a full year. The Unique Member count includes all unique individuals who have had coverage under a specific payer at any point in time during the year. Individuals with medical coverage under one payer and pharmacy coverage under another payer may show up twice in these counts.

**Note that The Centers for Medicare and Medicaid Services data is only available through 2013 due to different data deliveries from the submitter.

Special Conditions: Specific waivers were granted to individual submitters. For further information, please contact CIVHC.
