New Data Elements Available in the CO All Payer Claims Database (CO APCD)
Fall 2022

On an annual basis, Center for Improving Value in Health Care (CIVHC) updates the **Data Submission Guide (DSG)** identifying elements that payers must submit to the CO APCD. With each update, new fields become available for public, and in some circumstances, non-public releases (subject to data release rules and HIPAA/HITECH laws, etc.). The table below provides a summary of the new elements that are available with the latest DSG update (DSG 13).

Please Note: Some new data elements will not have historic years available since they are new submission requirements for payers. Additionally, with new submissions, some data fields may be missing or incomplete as health insurance payers adjust to new requirements. Please contact ColoradoAPCD@civhc.org to inquire about completeness for specific data elements.

New Element	Description	Claims Type(s)/Level
Member Coverage Information		
Language Preference	Indicates the primary language of the member. ANSI/NISO Z39.53-2001 standard	Member Eligibility
