

Shifting from Fee-for-Service in Colorado: The Primary Care Collaborative and Alternative Payment Models

July 21, 2022

CENTER FOR IMPROVING
VALUE IN HEALTH CARE

Agenda

- Introduction of Alternative Payment Models (APMs) and the value it offers to health care.
- Brief discussion regarding data intake, challenges, trends and summary of total medical spending for APMs
- Overview of the Primary Care Collaborative, recent legislation passed, and an overview of Medicaid's role in relation to primary care APMs
- Questions/Feedback from Participants
- **Housekeeping:** Session is being recorded, questions via the chat box

Presenters

David M. Keller, MD
University of Colorado School of
Medicine and Children's
Hospital of Colorado, Professor
and Vice Chair

Maria de Jesus Diaz-Perez, PhD
CIVHC, Director of Research
and Performance Measurement

Tara Smith
Colorado Division of Insurance,
Primary Care and Affordability
Director

Chris Kennedy,
District 23,
Colorado State Representative

Trevor Abeyta, Colorado
Department of Health Care
Policy and Financing, Payment
Reform Section Manager

Our Mission

We strive to empower individuals, communities, and organizations through collaborative support services and health care information to advance the Triple Aim: **Better Health**, **Better Care**, **Lower Cost**

We are:

- Non-profit
- Independent
- Objective

Who We Serve

Change Agents

Individuals, communities, or organizations working to lower costs, improve care, and make Colorado healthier.

What's in the CO APCD?

870+ Million Claims

36 Commercial Payers, + Medicaid & Medicare

5+ Million Lives

Nearly 70% of Insured (medical only)

2013-Present

How We Inform

Public CO APCD Data

Identify opportunities for improvement and to advance health care through public reports and publications

Non-Public CO APCD Data

Datasets and reports to address specific project needs aimed at better health, better care and lower costs

ALTERNATIVE PAYMENT MODELS: *PAYING FOR VALUE, NOT JUST FOR VOLUME*

David Keller MD, FAAP

Professor and Vice Chair of Pediatrics

University of Colorado School of Medicine and Childrens
Hospital Colorado

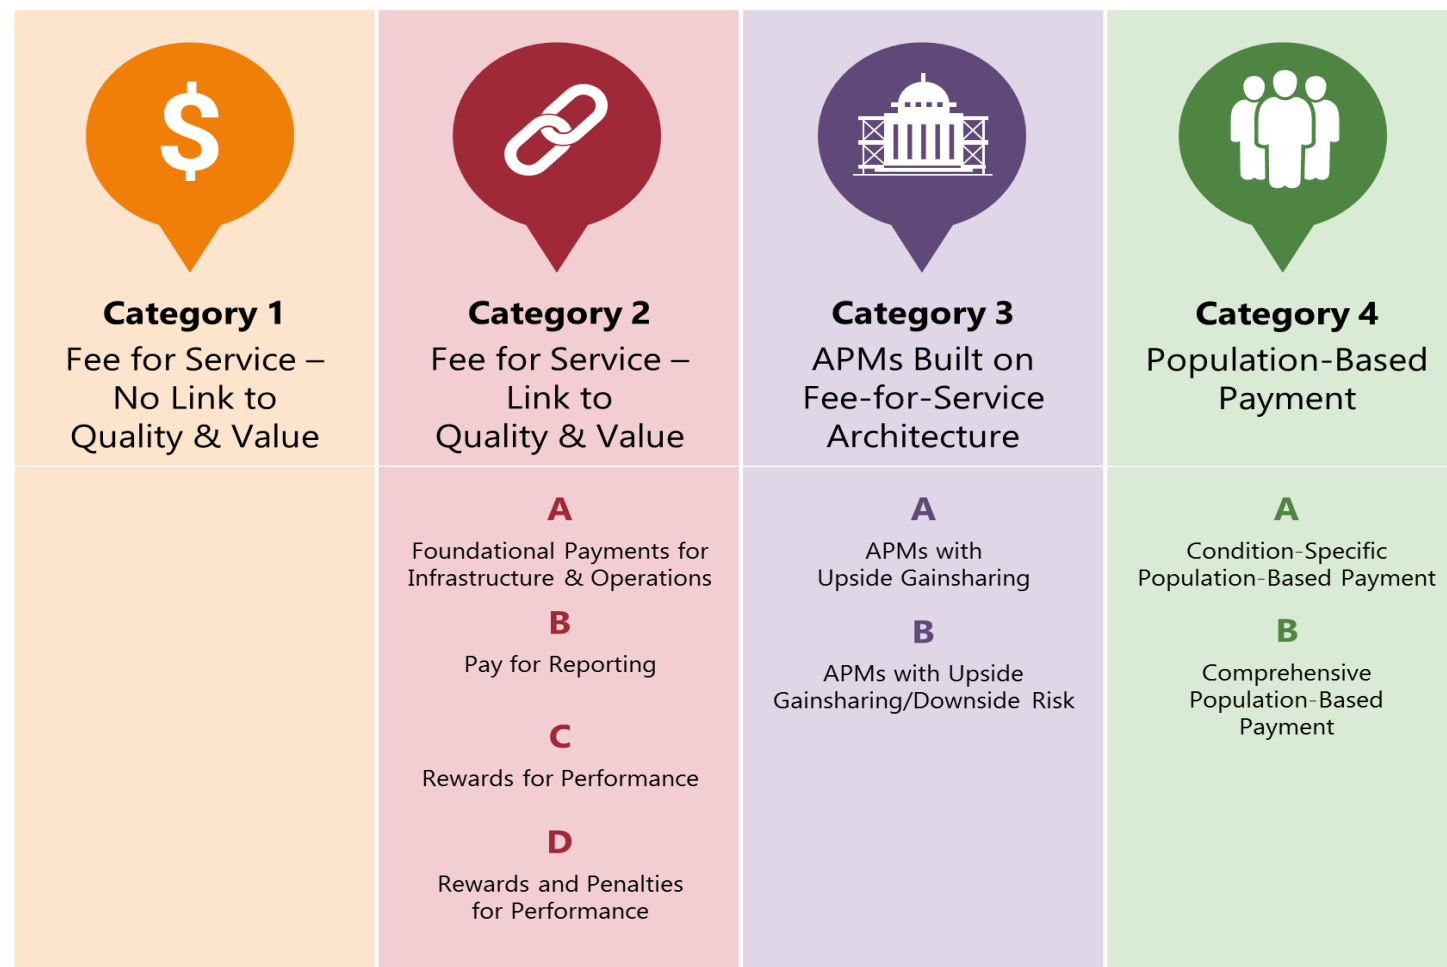

Idea: Changes in payment will drive changes in practice

- We need to pay for value, not just for volume
- *“If you are going to regulate something complicated, you need lots of dials”*
 - Paul Grundy, MD
- Value-based payment models are the dials!

Defining Value-Based Payments using HCP-LAN Alternative Payment Model Framework

<https://hcp-lan.org/groups/apm-fpt/apm-framework/>

Category 1: Fee for service

Process

- Provider performs service
- Provider codes service
- Provider bills patient (insurance)
- Patient pays co-pay (or percentage)
- Insurance pays based on code

KEY TO SUCCESS:

Coding

Volume

Category 2: Fee for service, Link to Quality and Value

Welcome to Your Coastal Medical Home

You are Part of the Care Team
We want to partner with you to improve your health.

Let us be a Resource
We can connect you to services in the community to improve your health.

Preventive Care Means Better Health
Preventive care will keep you healthy. Working together we can help prevent disease and promote a healthy life.

It's All About You
Your health matters to us!

Call us First! Call us Anytime
Call us anytime, including nights and weekends. We now offer Saturday sick visit appointments.

You Will Have More Time
Talk to us about your concerns. Everyone on our staff is trained to care for you.

COASTAL MEDICAL
Leaders In Primary Care

Smithfield

NCQA
Level 3
Recognized

- **Process**
- Provider performs service
- Provider codes service
- Provider bills patient (insurance)
- Patient pays co-pay (or percentage)
- Insurance pays based on code and on performance on quality and value metrics

KEY TO SUCCESS:

Coding

Volume

**Understanding and implementing
QI processes**

Category 3: APMs Built on Fee for Service Architecture

- **Process**

- Payer defines a covered population
- Provider performs service
- Provider codes service
- Provider bills patient (insurance)
- Patient pays co-pay (or percentage)
- Insurance pays based on code and on performance on quality/ value metrics
- Insurance and provider share in savings (and possibly losses)

KEY TO SUCCESS:

Coding

Volume

Understanding and implementing QI processes

Managing population health

Category 4: Population-based Payment

- **Process**
- Payer defines a covered population
- Insurance negotiated comprehensive payment to handle
- Provider(s) provides services
- Providers savings (and possibly losses)

KEY TO SUCCESS:

Coding

Volume

Understanding and implementing QI processes

Managing population health

Managing risk

As always:

The Devil is in the Details

Payment Model	Pitfalls in Operationalizing
FFS	<ul style="list-style-type: none">• Fee schedule favors procedural over cognitive care• Overall inadequate primary care reimbursement
Traditional Capitation	<ul style="list-style-type: none">• Lack of adequate risk adjustment for patient needs• Basing rates in historic inadequate FFS payments
Pay for Performance	<ul style="list-style-type: none">• Measures largely disease-focused, often process rather than outcomes, not patient-oriented or reflective of key components of primary care• Delays in receiving incentives
Shared Savings/ACOs	<ul style="list-style-type: none">• Providers still paid FFS• Basing benchmarks on historic expenditures rewards prior inefficiency• Lag in receiving savings
Blended FFS and Capitation	<ul style="list-style-type: none">• Predominance of FFS over PMPMs may not reach a tipping point that enables restructuring practice

Stephanie Gold, Presentation to the PCPRC, 2019

What about children?: Don't really fit the model

- 24% of population
 - Less chronic disease
 - Great impact of social conditions
- Important outcomes are harder to measure
 - Take longer
 - Cross systems
- 11% of total spend
- Savings may not be enough to fund transformation

Total Health Spend, 2018, \$3.6T

CIVHC APM Collection and Analysis

- Maria de Jesus Diaz-Perez, Director of Research and Performance Measurement

CENTER FOR IMPROVING
VALUE IN HEALTH CARE

Background

- In 2019, CIVHC began collecting APM information from health insurance payers for the first time through Data Submission Guide rule change.
 - House Bill 19-1233 passed the same year - Concerning payment system reforms to reduce health care costs by increasing utilization of primary care

Data Sources:

1. Payer-submitted APM files

- CIVHC receives APM submission from 13 payers.
 - Each payer submits a test file in July and submits a production file in September
 - CIVHC validates the test files and shares the findings to the payer

2. Claims from the CO APCD

- For FFS-only payers, primary care and total medical spending data is sourced from the CO APCD.

Background: Alternative Payment Model Data Collection Timeline and Challenges

2019

- Produced claims-based Primary Care report, based on methodology used by Balit, Friedberg and Houy (2017).
- Adopted Oregon Health Authority APM classification
- Initial APM data collection

2020

- The Collaborative issued first set of recommendations:
 - CIVHC implemented Primary Care definition
 - HCP LAN categorization for APM collection
- Technical modifications to APM data collection:
 - Colorado resident vs. contract situs
 - Added Line of Business detail

2021

- Changes to APM data collection:
 - Added fields to identify prospective/retrospective payments
 - **Qualitative Supplement to APMs submission**
- **Improved APM data collection and validation process by increasing engagement with carriers' data and policy teams**
- **Attestation requirement**

Background: APM Data Collection and Validation Process

Challenges and Lessons Learned

- Define denominator
 - Including pharmacy, dental or vision services
- Implications of primary care definition
- Need of continued conversations with carriers
 - Building connections and relationships between data and program/policy teams within carriers
- Plans identify primary care providers differently than the definition recommended by the Collaborative and used by CIVHC
 - Using a state health care workforce data directory as an external validation
- Medicaid puzzle
 - Working more closely with the State Medicaid agency to ensure that payments associated with ACCs are properly represented

Investing in Primary Care

Tara Smith, Primary Care and Affordability Director
Colorado Division of Insurance

COLORADO
Department of
Regulatory Agencies
Division of Insurance

House Bill 19-1233

Concerning payment system reforms to reduce health care costs by increasing utilization of primary care

PCPRC Composition & Responsibilities

RESPONSIBILITIES

- Advise in the development of affordability standards and target investments in primary care
- Analyze the percentage of medical expenses allocated to primary care
- Develop a recommendation of a definition of primary care
- Identify barriers to the adoption of alternative payment models (APMs) by health insurers and providers
- Develop recommendations to increase the use of APMs
- Increase investment in primary care delivery without increasing total costs of care and costs to consumers

Primary Care & APM Spending Report - APCD

- APCD administrator shall provide an annual report to the Commissioner for use by the PCPRC regarding primary care spending by:
 - Commercial carriers;
 - Colorado's Medicaid program (Health First Colorado); and
 - Children's Health Insurance Program (CHP+)
- Report must include:
 - Percentage of total medical expenditures allocated to primary care;
 - Share of payments that are made through nationally recognized APMs;
 - Share of payments that are not paid on a fee-for-service (FFS) or per-claim basis

PCPRC Annual Recommendation Reports

Theme 1: Investing in primary care

Theme 2: APMs and payer alignment

Theme 3: Health equity and collaboration

<https://doi.colorado.gov/insurance-products/health-insurance/health-insurance-initiatives/primary-care-payment-reform>

PRPCR Recommendations

2019	2020	2021
Broad and inclusive definition of primary care	Multi-payer alignment	Guiding increased investment in primary care
Primary care investment target	Measuring primary care capacity and performance	Centering health equity in APMs
Measuring the impact of primary care spending	Measuring system-level success	Integrating behavioral health in a primary care setting
Investing in advanced primary care delivery models	Incorporating equity into the governance of health initiatives	Increasing collaboration between primary care and public health
Investing in infrastructure and through APMs	Data collection to address health equity	

Primary Care Expenditures - APCD Reporting

- HCP LAN categorization for APM collection
- Broken out by line of business
- Added fields to identify prospective payments

- Family medicine physicians in an outpatient setting and when practicing general primary care
- General pediatric physicians and adolescent medicine physicians in an outpatient setting and when practicing general primary care
- Geriatric medicine physicians in an outpatient setting when practicing general primary care
- Internal medicine physicians in an outpatient setting and when practicing general primary care (excludes internists who specialize in areas such as cardiology, oncology, and other common internal medicine specialties beyond the scope of general primary care)
- OB-GYN physicians in an outpatient setting and when practicing general primary care
- Providers such as nurse practitioners and physicians' assistants in an outpatient setting and when practicing general primary care
- Behavioral health providers, including psychiatrists, providing mental health and substance use disorder services when integrated into a primary care setting

DOI Regulation 4-2-72

Primary Care Investment

Requirement:

- One percentage point increase in 2022 and 2023

Target:

- 25% primary care expenditures through prospective payments by end of CY 2023

APM Expenditures

Target:

- 50% of total medical expenditures in APMs by end of 2022
- 10% of APM expenditures through prospective payments by end of CY 2022

Colorado APM Alignment Initiative

Primary Care Aligned APM

- Primary care provider types
- Adoption of advanced primary care delivery competencies
- Aligned quality measures
- Support to primary care practices to facilitate transition to APMs
- Advanced APM considerations
 - Services included in APMs
 - Shared savings models for children's care
 - Patient attribution
 - Risk adjustment
 - Prospective payments
- Monitoring APMs for unintended consequences

Maternity Care Aligned APM

- Episode definition
 - Timing
 - Patient population
 - Services
- Accountable entity
- Aligned quality measures
- Risk adjustment
- Patient attribution
- Provider/practice support

State Transformation Collaboratives (STCs)

The STCs offer a new approach to VBC models and APM design.

Objective:

Shift the economic drivers away from fee-for-service to a person-centered approach to health through alignment among Medicare, Medicare Advantage, Medicaid, and commercial payers and purchasers in selected states

Potential Goals:

- Shift 60% of payments to an APM for participating providers in a state
- Avoidable hospitalizations
- 2 to 3 state-specific goals tailored to local needs

Key Components

4 distinct state collaboratives

Comprised of payers, providers, health systems, purchasers, patient advocates, and community organizations

Locally-focused approach that features state level Medicare and Medicaid alignment

Prioritizes states with greatest opportunity to impact health equity

Looking ahead

→
APM Alignment Initiative

→ (TBD)

State Transformation Collaborative

THANK YOU

House Bill 22-1325: Alignment of Quality Metrics & Alternative Payment Model Parameters

Representative Chris Kennedy

July 21, 2022

- ▶ Limited cooperation from health insurance carriers
- ▶ Fear among providers of under reimbursement, perverse incentives, and unintended consequences
- ▶ Increased focus on systems that advance equitable outcomes

Why was additional legislation needed?

- ▶ Establishes a process that includes the Division of Insurance, the Department of Health Care Policy & Financing (Medicaid), and the Department of Personnel & Administration (State Employee Plans)
- ▶ Sets clear goals for what APMs are to achieve, including:
 - ▶ Increased primary care investment & better healthcare system value
 - ▶ Improved access and more equitable outcomes
 - ▶ Integration of behavioral health care

House Bill 1325

- ▶ Directs the Division of Insurance to establish aligned APM parameters, including:
 - ▶ Quality Metrics
 - ▶ Risk Adjustment
 - ▶ Attribution Methodologies
 - ▶ Core Competencies
- ▶ Requires state-regulated insurance companies to incorporate these parameters into their APMs for plans issues on or after January 1, 2025
- ▶ Requires data collection & analysis

House Bill 1325
