- b. Table 2: Other Primary Care Provider Taxonomies
- c. Table 3: Primary Care Services (CPT-4 Procedure Codes)
- d. Table 4: Defining Outpatient Setting (Place of Service Codes)

Appendix H: Frequently Asked Questions

Appendix I: SFTP Submission Instructions

Appendix J: CO APCD DSG 14 Testing Instructions

Note: The Center for Improving Value in Health Care (CIVHC) is basing its approach to collecting information about Alternative Payment Models (APM) on a program established by the Oregon Health Authority (OHA). The instructions in this document include language from a 2018 memorandum from the OHA to payers about requirements for submitting data on APMs. We wish to express our thanks to OHA for their generous assistance in the creation of this document.

I. Introduction

In October 2018 and in accordance with Code of Colorado Regulation 10 CCR 2505-5, the Department of Health Care Policy and Financing (HCPF) changed the rules governing the All Payer Claims Database (APCD) Data Submission Guide (DSG) to require the Center for Improving Value in Health Care (CIVHC) to collect data on alternative payment models and prescription drug rebate information from public and private payers.

"Alternative Payment Model (APM) file" means a detailed file that captures payments made to providers outside of the traditional fee-for-service model. This includes: Foundation Payments for Infrastructure and Operations, Pay for Reporting, Pay for Performance, Shared Savings, Shared Savings and Downside Risk, Risk Based Payments NOT Linked to Quality, Condition-Specific Population-Based Payment, Comprehensive Population-Based Payment, Integrated Finance and Delivery Systems, and Capitated Payments NOT Linked to Quality. APM files are submitted according to the requirements contained in the submission guide. The first submission, which is a test file of APM data for 202020, is due from payers in July 2023. Final files for each of the three calendar years from 2020-2022 are due by **September 1st, 2023.**

This Data Submission Manual provide instructions to assist payers in reporting APM data.

2. Why Collect APM Data?

The goal for collecting APM data is to track progress in the transition from fee-for-service to valuebased reimbursement and, ultimately, to evaluate the impact of APMs on quality and cost of care.

There are a growing number and variety of APMs, and we currently lack the ability to track spending and the number of patients receiving care under these models. Collecting data on APMs will enable researchers, policy makers, health plans, providers and other stakeholders to establish baseline information regarding current spending levels and the number of patients receiving health care under APMs (vs. traditional fee-for-service) and track changes over time.

Information on APMs also help to identify the types of APMs that are most effective in reducing costs and improving quality, informing the development of policy solutions to improve the value of health care.

3. File Submission Instructions and Schedule

| Alternative Payment Model and Drug Rebate Data Submission Schedule | | | | |
|--|---|--|--|--|
| Date | Files Due | | | |
| July I, 2023 | Waiver request due (if applicable) | | | |
| July 17, 2023 | • Test files of data for 2020 due | | | |
| September I, 2023 | • Final files for three calendar years: 2020, 2021 and 2022 | | | |

Payers should submit APM information according to the following schedule:

For the 2023 submission year, files will be submitted either via Excel (.xlsx, .xls, or .csv) or text format (.txt). Please see the chart below for specific instructions for each file type and links to Excel templates, if applicable. The **APM** file types associated with this manual are highlighted in **orange** below for your convenience.

| Annual File Submission Format by File Type | | | | | | | | |
|--|------|-----|--|--|--|--|--|--|
| File Type Format Link to Template | | | | | | | | |
| AM: Alternative Payment Model | .txt | N/A | | | | | | |

| Annual File Submission Format by File Type | | | | | | | | |
|--|-------|------------------|--|--|--|--|--|--|
| CT: APM Control Total | .txt | N/A | | | | | | |
| AC: APM Contract (formerly 2 nd tab in CT file) | Excel | AC File Template | | | | | | |
| DR: Drug Rebate | .txt | N/A | | | | | | |
| PB: PBM Contract (formerly 2 nd tab in DR file) | Excel | PB File Template | | | | | | |
| PD: Prescription Drug Affordability Board | Excel | PD File Template | | | | | | |
| VB: Value-Based Pharmacy Contract | Excel | VB File Template | | | | | | |

Naming conventions should follow the template:

TESTorPROD_PayerID_SubmissionYearDueFileTypeVersionNumber.FileExtension

For example, the following naming conventions will be used for testing and production in 2023:

TEST_0000_2023AMv01.txt PROD_0000_2023CTv02.txt TEST_0000_2023VBv01.xlsx PROD_0000_2023PBv02.xlsx

4. Waivers for APM-related files

CIVHC will work collaboratively with payers to ensure that required APM data are submitted in a manner that satisfies the intent of the Data Submission Guide rules. These rules have been put in place to deliver a high quality, reliable source of data for Colorado.

CIVHC will consider requests from data submitters for file exemptions under certain circumstances. Data submitters should submit a waiver request for the **APM filing** if their organization meets one of the following criteria:

- 1) Payer does not provide medical benefits (e.g., payer only provides prescription drug benefits, payer only provides dental benefits, etc.)
- 2) Payer only provides supplemental insurance (e.g., Medicare Supplemental policies only)
- 3) Payer only reimburses providers on a Fee-for-Service model

If you believe your organization is not obligated to submit an APM file, but your circumstances do not fall under items 1, 2, or 3 above, please contact CIVHC.

If you believe you are unable to fully comply with the Data Submission Guide's specifications for the APM filing due to other reasons, please contact CIVHC. Do not submit a waiver form as these circumstances are handled separately.

Please see Appendix A for instructions for filing a waiver and waiver form.

5. Changes to APM Data Submission Manual

The following are changes to this APM Data Submission Manual, which were adopted following the Data Submission Guide v14 Rule Hearing on November 29, 2022.

- Addition of one new field to the APM file that identifies RAE Indicator (AM024).
- Addition of one new field to the APM file that identifies RAE Indicator (CT018)

- Addition of one new field to the APM files that identifies Payer Code
- Reordered field numbering due to addition of two new fields

6. Data Submission of APM Details – General Rules

The submission of APM data involves the completion of three files:

- The first captures payment details of each APM, submitted at the billing provider level of granularity. This file type is called the Alternative Payment Model detail file (AM).
- The second provides a control total or summary of APM details at a more aggregated level of granularity. This file type is called the APM Control Total file (CT).
- The third provides high-level, qualitative attributes and details surrounding each type of APM reported in the AM/CT files. This file type is called the APM Contract file (AC).

The following are general rules for completing the first file. More detail about the content of the APM data submission files is included in section 8 of this document. A sample of a completed file is included in Appendix B. Rules for completing the control total file can be found in section 7.

| APM File Selection Cr | iteria Summary |
|---|--|
| Include | Exclude |
| Payments to health care providers | Payments to vendors, other health plans, community organizations that do not provide healthcare services, or payments received from government entities |
| All health care providers who received reimbursement, including providers who only have fee- for-service arrangements, during the performance period | Providers who did not receive any reimbursement during the performance period |
| Payments for substance abuse disorder services | |
| Claims and payments paid as primary | Claims paid as secondary or tertiary payer |
| Claims and payments attributed to Colorado residents | |
| Payments for services rendered January 1, 2020 – December 31, 2022, and paid through June 30, 2023 | Payments made on or after July 1, 2023 |
| Commercial, Medicaid, and Medicare Advantage lines of business and self-insured plans not subject to ERISA | Prescription only, dental only, vision only lines of business |
| If ERISA self-insured data is included in a payer's monthly APCD submissions then it should be included in the APM file as well | |

6a. Level of Reporting APM Information

In accordance with Code of Colorado Regulation 10 CCR 2505-5, payers must report APM information at the billing provider level. All claims and non-claims payments shall be reported for each billing provider or organization and payment arrangement type.

The type of APM to which a provider organization and a member should be attributed is determined by the contractual arrangement between the payer and the provider organization. All payments for services reimbursed under a given arrangement and/or services that are considered when determining incentive payments, including both claims and non-claims expenditures, should be submitted under the same payment arrangement category.

For example, for a physician group with a contract specifying prospective per member per month payment for comprehensive health care services, payments should be classified as a comprehensive population-based payment arrangement (4B) in the payment arrangement category column (AM007). The payment amount should be recorded under the non-claims payments fields (AM014, AM015, AM018, and AM019).

For providers under a procedure-based bundled payment contract who receive FFS payments with a retrospective reconciliation, the payment amount is classified as an APM with Shared Savings and Downside Risk (3B). The payment amount associated with the FFS payment mechanism should be recorded under the claims payments fields (AM012, AM013, AM016 and AM017) and the financial settlement should be recorded under the non-claims payments fields (AM014, AM015, AM018, and AM019). Both the claims and non-claims elements to the **3B arrangement should be reported on the same 3B record.** Please refer to Appendix B for an example on how to correctly submit these types of payments.

For providers under a pay-for-performance contract, include both the incentive payments and all payments for services that are considered when evaluating provider performance, even if the services are reimbursed on a FFS basis, under 2C (Pay-for-Performance). The claims payments for services are considered 2C and not category 01 (Fee-For-Service) because the care is delivered with the performance incentive in mind and are therefore linked to quality. **Both the claims and non-claims elements to the 2C arrangement should be reported on the same 2C record.**

If a large APM-related payment is sent to the financial parent of a health system (e.g., Independent Practice Association), the payer should attempt to report the portion of payments that were distributed to its billing providers. If a payer is unable to report at this level of granularity, then please contact CIVHC.

If, in addition to the large APM-related payment to the financial parent, additional payments were made to the individual providers, then those additional provider payments should be reported as well. In this way, CIVHC will be able to sum all of the payments to calculate the total dollars paid by each payer.

The APM file should only include payments to health care providers. It should NOT include payments to vendors, other payers/health plans or payments received from government entities.

6b. Reporting Payments

6b(i) Payments to Include

The APM data files are meant to capture all payments to providers, not just alternative payments. Fee-for-service is included as a required payment arrangement category for reporting. Therefore, if the only payment made to a billing provider was under a FFS arrangement, then the claims payment fields (AM012, AM013, AM016 and AM017) should be populated with the appropriate payment amounts and non-claims payment fields (AM014, AM015, AM018, and AM019) should all reflect \$0. Only in instances where there is no payment at all made to a particular billing provider or organization for contracts during the reporting period, should that billing provider be omitted from the file.

APM claims and non-claims payments should include those for substance use disorder, since these payments will be reported in aggregate and cannot be identified.

6b(ii) Calculating Total Payments

Reported total payments should represent the allowed amounts, i.e. carrier payment and any patient cost sharing amounts.

The total allowed amount is the sum of: Copay (MC065) + Coinsurance (MC066) + Deductible (MC067) + Payer portion (plan paid, MC063)

6b(iii) Payment Categories

The data collection files include four payment categories, two that pertain to primary care payments and two that pertain to total payments. The two primary care payment categories are subsets of the total payment categories. Total Primary Care Claims Payments (AM012) is a subset of the value input for Total Claims Payments (AM016). Total Primary Care Non-Claims Payments (AM014) is a subset of the value input for Total Non-Claims Payments (AM018).

All four of the payment values listed above also have an associated Payer Portion field (AM013, AM015, AM017A, and AM019). The Payer Portion is a subset of the Total Payment value (e.g., AM013 is a subset of AM012). The claims-based Payer Portion fields (AM013 and AM017) correspond to the data submitted in the Plan Paid field (MC063) on the monthly claims' files. These new fields were requested by the Division of Insurance (DOI) to understand the impacts of their regulations on primary care spend.

Starting under DSG 13, CIVHC will also collect recoupments in the Recoupments from Provider field (AM020). This field is meant to capture any funds going from the provider back to the payer as a result of missed quality metrics, missed spending targets, or APM reconciliation payments. The intent behind collecting recoupments from providers is for stakeholders, specifically the DOI, to understand the extent to which payers must recoup funds from providers.

Note that all other payment fields should be reported *net* of provider recoupments. For example, if a provider received \$500 in non-claims payments from a payer in a given year but had to repay \$50 to the payer due to missed quality metrics, the payer should report the net \$450 in Total Non-Claims Payments (AM018) and report \$50 in Recoupments from Provider (AM020).

6b(iv) Prospective Payment Flag

Prospective payments refer to any payments made to providers in advance of services rendered. Typically, these are based on predetermined payment amounts for services.

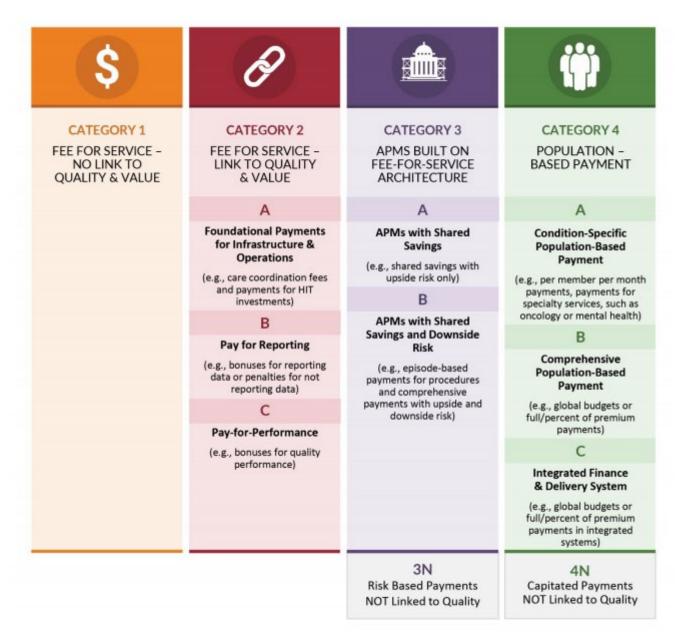

If a provider contract arrangement includes any prospective payments, then the Prospective Payment Flag (AM007) should be populated with 'Y', even when retrospective reconciliation is part of the contract. Population-based payment arrangements (4A, 4B, 4C, and 4N) likely include prospective payments, though other payment arrangement types in category 2 and 3 might also be considered prospective. If the provider contract does not include any prospective payments then the flag should be submitted as 'N'. Please direct any specific questions to CIVHC.

6c. APM Categories

For payment model assignment, payers should classify payments and member months based on payment arrangement categories defined by the Health Care Payment Learning & Action Network (HCP LAN). The HCP LAN Framework is illustrated below. The full definition of each APM Framework category is included in Appendix E.

The Framework is used to assign payments from payers to health care providers to four Categories, such that movement from Category I fee-for-service to Category 4 population-based payments involves increasing provider accountability for both quality and total cost of care.

Health Care Payment Learning & Action Network (HCP LAN) APM Framework

For additional information about the HCP LAN APM categories and their definitions, please go to: <u>https://hcp-lan.org/apm-refresh-white-paper/#1466615468036-18abb176-bf37</u>

The type of APM to which a provider organization and a member should be attributed is determined by the contractual arrangement between the payer and the provider organization. All payments associated with a contract, even those that include both fee-for-service and non-claims payments (e.g. 3B APMs with Shared savings and Downside Risk), should be reported on the same APM record. Fee-for-service payments that are used to determine incentive payments (e.g. 2C Pay-for-Performance) should also be included on the APM record. In these situations, both the claims' payments (AM012, AM013, AM016, and

AM017) and non-claims payments fields (AM014, AM015, AM018, and AM019) will be populated. **Do not** report the fee-for-service component of an APM contract separately under Category I (Fee For Service). Please refer to Appendix B for an example on how to correctly submit these types of payments.

6d. Member Population Included

Payers should include only information pertaining members who reside in the state of Colorado. A Colorado resident is defined as any eligible member whose residence is within the State of Colorado, and all covered dependents. An exception to this is subscribers covered under a student plan. In this case, any student enrolled in a student plan for a Colorado college/university would be considered a Colorado resident regardless of their address of record.

For example, if an individual lives in Wyoming but has commercial coverage through their employer based in Colorado, information for this individual would be NOT be included. Conversely, if a Colorado resident works in Wyoming and has commercial coverage through their employer, their data would be included.

Payers should only include information for members for which they are the primary payer, and exclude any paid claims for which it was the secondary or tertiary payer.

6e. Calculating Member Months

Reporting member months is required for certain types of payment arrangements that are populationbased (e.g. APMs with shared savings, comprehensive population-based payments). When required, payers should include the total number of members (represented in member months) that were included in the calculation of the reported APM.

If your organization covers a person for even one day of the month, even if it is the 1st or the 31st, then this counts as a member month.

Note that a given member could receive services from multiple providers in the same reporting period, all of whom received payments under APMs with shared savings and downside risk and condition-specific population-based payments. When this occurs, the sum of all member months associated with alternative payment arrangements will exceed the actual total of unique member months. The control total file is intended eliminate the duplication of member months (see section 7).

6f. Lines of Business Included

Payers should submit APM data for commercial, Medicaid and Medicare Advantage lines of business and self-insured plans not subject to ERISA. If the payer currently provides information for ERISA self-insured plans in monthly claims submissions, data for these members should be included in the APM submission. **Please direct any questions to CIVHC.**

Payers are not required to submit APM data for these lines of business: prescription drugs only, dental benefits only, vision benefits only.

Below is a detailed list of included and excluded lines of business:

- Lines of business that must be included:
 - (A) Medicare (parts C, D, and Dual Special Needs Plans);
 - (B) Medicaid;
 - (D) Individual;
 - (E) Small employer health insurance;
 - (F) Large group;

(G) Associations and trusts;

(H) Self-insured plans not subject to ERISA

(I) Self-insured plans subject to ERISA, if data for these members are included in monthly claims submissions

- Lines of business that should be excluded:
 - (A) Accident policy;
 - (B) Dental insurance;
 - (C) Disability policy;
 - (D) Hospital indemnity policy;
 - (E) Long-term care insurance;
 - (F) Medicare supplemental insurance;
 - (G) Specific disease policy;
 - (H) Stop loss only policy;
 - (I) Student health policy;
 - (J) Supplemental insurance that pays deductibles, copays or coinsurance;
 - (K) Vision-only insurance; and
 - (L) Workers compensation
 - (M) Prescription drug only policy

6g. Performance Period

The APM submission performance periods are calendar years and should include payments for services **incurred** during each calendar year. For example, for calendar year 2020, claims payments to a provider should include payments for services incurred between January 1, 2020, and December 31, 2020. Non-claims payments should include payments for contract periods/services during 2019. This performance period should be documented as AM009 (Performance Year) = 2020.

All three Performance Years included in this year's filing (2020, 2021, 2022) should include all expenditures **paid through June 30, 2023.**

When payments occur during contract periods that fall partly outside of the APM submission calendar year, contact CIVHC to discuss the proper method of reporting these payments.

6h. Defining Primary Care

CIVHC uses the definition established by the Colorado Primary Care Payment Reform Collaborative. This definition was operationalized as payments made to a primary care provider for a primary care service. Included in this definition are services delivered by behavioral health providers who practice in an integrated primary care setting.

6h(i) Reporting Primary Care Claims Payments

The primary care definition consists of two components that should be summed to produce total primary care payments:

A. <u>Outpatient services delivered by primary care providers</u> (which includes OB/GYN providers), defined by a combination of primary care provider taxonomy and primary care CPT-4 procedure codes

B. <u>Outpatient services delivered by behavioral health providers, nurse practitioners and physician</u> <u>assistants</u>, defined by a combination of the "other" provider taxonomy and primary care CPT-4 procedure codes AND billed by a primary care provider (defined by primary care taxonomy)

Include services delivered in an outpatient setting and exclude facility claims and inpatient services.

| Component | Setting Requirement | | Procedure Requirement | | Service Provider Taxonomy Requirement | | Billing Provider Taxonomy Requirement |
|-----------|--|---|--|---|--|---|--|
| Α | Outpatient (defined by place of service codes in <i>Appendix F</i> , <i>Table 4</i> or FQHC/RHC taxonomy) | + | Primary Care (defined by CPT-4 codes in Appendix F, Table 3) | + | Primary Care (defined by taxonomies in Appendix F, Table 1) | + | None |
| В | Outpatient (defined by place of service codes in Appendix F, Table 4 or FQHC/RHC taxonomy) | - | Primary Care (defined by CPT-4 codes in <i>Appendix F,</i> <i>Table 3</i>) | | Other Primary Care (defined by taxonomies in Appendix F, Table 2) | | Primary Care (defined by taxonomies in Appendix F, Table 1) |

Please note that for CPT-4 procedure codes that describe global services for vaginal or Cesarean deliveries, payments should be multiplied by 60% to approximate the payments for antepartum and postpartum services only. This applies to both total payments and plan payments fields. All delivery CPT-4 codes that should be adjusted are flagged in Appendix F, Table 3.

Please refer to the attached SQL as the basis for extracting these data from your systems. This programming code includes filters to select only services with relevant outpatient places of service (see lines 103-104 and 176-177 in <u>APM Primary Care Code_FINAL</u>).

6h(ii) Reporting Primary Care Non-Claims Payments

Include non-claims-based payments for services delivered by:

- Providers with specialties in the primary care taxonomy (Appendix F, Table I)
- Behavioral health providers with a specified taxonomy (Appendix F, Table 2) that deliver care that is integrated with primary care (i.e., either within the primary care practice or through working relationships that involve close communication and collaboration with primary care providers)
- Payments to Nurse Practitioners and Physician Assistants (Appendix F, Table 2) that deliver primary care or work within a primary care practice

Please reach out to CIVHC if your organization is unable to identify specific service providers within a large contract and need assistance allocating or estimating non-claims primary care expenditures.

7. Data Submission of APM Control Totals – General Rules

"Control Total File" means a file that captures aggregated data related to payments made to providers outside of the traditional fee-for-service model. This includes: Foundation Payments for Infrastructure and Operations, Pay for Reporting, Pay for Performance, Shared Savings, Shared Savings and Downside Risk, Risk Based Payments NOT Linked to Quality, Condition-Specific Population-Based Payment, Comprehensive Population-Based Payment, Integrated Finance and Delivery Systems, and Capitated Payments NOT Linked to Quality. APM files are submitted according to the requirements contained in the submission guide.

The Control Total file is meant to accompany the AM file by eliminating some detailed granularity from the APM file to allow for higher-level analysis.

The following are general rules for completing the Control Total file. Note that several of the instructions listed in the above Section 6 can be applied to the Control Total file (i.e., reporting payments, defining primary care, etc.). The contents of the Control Total data submission file and supplement are displayed in section 8 and 9. A sample of a completed file is included in Appendix C and D.

7a. Reporting Member Months in the Control Total File

The control total file captures information summarizing the payer's detailed data from the APM file at the year, insurance product type, and payment arrangement category level of granularity. In other words, the control total removes one level of granularity (Billing Provider) from the APM file. This information allows CIVHC to understand payment trends across time and payer type (Medicare, Medicaid, Commercial, Medicare Advantage) without duplicating member months.

Member months expressed in the Control Total file should de-duplicate the member months reported in the APM file.

Three Member Month values should be reported in the Control Total file:

- CT007 (Payment Arrangement Category Member Months),
- CT008 (All Member Months), and
- CT009 (Total Alternative Arrangement Member Months)

Payment Arrangement Category Member Months (CT007) includes the de-duplicated member months for the associated Year (CT004), Insurance Product Type Code (CT005), and Payment Arrangement Category (CT006). If any member is attributed to multiple providers within the same payment arrangement category in a given year, then their eligibility months should only be counted once in the CT007 field. Payers should report '0' under CT007 for non-population-based payment arrangements.

<u>Example:</u> Suppose an HMO member can be attributed to two providers participating in a comprehensive population-based payment model (category 4B) in a given year. This member's 12 eligibility months will be counted under both providers in the member months field (AM009) in the APM file. However, since the Control Total member months field associated with the 4B payment arrangement category should represent the distinct count of member months, the member months from the APM file need to be de-duplicated. Therefore, the member months should be equal to 12, not 24 under APM category 4B.

All Member Months (CT008) includes all de-duplicated member months for the associated Year (CT004) and Insurance Product Type Code (CT005), regardless of payment arrangement type. This field should be all-encompassing of members for which you are the primary medical insurance carrier, regardless of the payment arrangement type and regardless of whether the member used services during the reporting period. **CT008 should repeat for each record associated with a given year and insurance product type code.**

Total Alternative Arrangement Member Months (CT009) includes all de-duplicated member months associated with any population-based payment arrangement for the associated Year (CT004) and Insurance Product Type Code (CT005). Payers should report '0' under CT009 if the given insurance product type/year combination does not involve any population-based payment arrangements. **CT009 should repeat for each record associated with a given year and insurance product type code.**

Example: Suppose a PPO member visits two different providers in 2019 One provider is reimbursed under a pay-for-performance arrangement (2C) and the other provider is reimbursed under an APM with shared savings and downside risk (3B). The member months for this member will be counted in both payment arrangement rows in the Control Total file under CT007, but should be counted only once under CT009.

Please refer to Appendix E to find examples of these member months scenarios.

7b. Reporting Payments in the Control Total File

Payments should be summed from the APM file and grouped by Year (CT004), Insurance Product Type Code (CT005), and Payment Arrangement Category (CT006) and separated into the same categories defined in the APM file (claims vs non-claims and primary care vs total payments). The Payer Portion amounts should be summed in a similar way. The totals reported in the Control Total file should align with the sum of payments reported in the APM file.

8. Data Submission of APM Contract Supplement – General Rules

"APM Contract Supplement file" means a file that captures qualitative information related to alternative arrangements between carriers and providers; submitted according to the requirements contained in the submission guide.

The purpose of the Contract Information Supplement is to ensure that the provider arrangements are appropriately classified and that the associated expenditures are submitted correctly in the APM and CT files. This important contextual information helps to validate that organizations are accurately represented in CIVHC's analyses of APM and primary care investment in Colorado.

Each of the data elements represents a question that CIVHC consistently asks payers related to each payment model when assisting them with categorizing payments into the Health Care Payment Learning and Action Network (HCP LAN) framework. The addition of the supplemental contract information helps to facilitate these discussions, standardize the information, and streamline this effort. CIVHC does not intend to share this information publicly.

The supplement should include an entry for each type of contract represented in the APM and Control Total files (e.g. episode-based payments for orthopedic procedures or mental healthspecific population-based payments). **There does not need to be an entry for each individual provider contract. Contracts** that are entirely fee-for-service also do not need to be included.

Please see the following detailed information surrounding each field in the APM Contract Supplement:

Contract Type Name (AC003) should be populated with the name of the overall contract. Examples include 'Patient Centered Medical Home' and 'Musculoskeletal Capitation Program.'

Contract Description (AC004) should include a description, or summary, of the alternative payment model contract type. It should be 3-5 sentences describing the nature of the contract type including a summary of services provided, provider reimbursement method, and any other important details related to the purpose and structure of the contract type. If a contract type includes a measurement of quality, then the payer should describe the quality measurements.

Involves both claims and non-claims (AC005): Populate this field with the value that best answers the questions, 'how are providers reimbursed under this contract?' and if applicable, 'how is quality evaluated under this contract?' For example, a full capitation program under category 4 with no fee-for-service would be submitted as N (non-claims only). A pay-for-performance contract that includes a bonus payment determined by quality measures which are calculated using claims data would be submitted as B (both claims and non-claims). The value of this field should also correspond with the associated expenditures are submitted in the APM file.

Services Covered (AC006): Populate this field with the value that best answers the question, 'what services are providers reimbursed for under this contract?' For example, infrastructure payments would most likely be submitted as N (non-medical services) and an episode-based shared savings program would be submitted with S (specific set of medical services). Multiple values can be submitted if applicable.

Involves measurement of quality (AC007): Populate with 'Y' if quality measure results are used to determine incentive payments, reimbursement, or provider eligibility for the program. If this field is populated with a 'Y,' then the Contract Description field (AC004) should contain details related to the quality measures evaluated for reimbursement.

Involves measurement of spending targets (AC008): Populate with 'Y' if providers are evaluated against medical spending goals or a budget.

Payments are prospective or retrospective (AC009): Populate this field with the value that best answers the question, 'when are providers reimbursed for services under this contract?' Payments that are not for medical services will most likely be submitted as N/A. Arrangements built on a fee-for-service architecture, categories 2 and 3, will most likely be submitted as RT (retrospective). Category 4 population-based payments will most likely be either PR (prospective with retrospective reconciliation) or PN (prospective without retrospective reconciliation). Expenditures associated with arrangements described as including prospective payments should be submitted with a Prospective Payment Flag (AM008) = Y in the APM file.

Payment is population-based (AC010): Populate with 'Y' if member months are used to determine provider reimbursement or incentive payments. Arrangements that are described as population-based should include the associated member month information in the APM and CT files.

Risk to Provider (AC011): If the provider assumes risk when providing services then populate with D (downside risk only) or B (upside and downside risk), depending on the arrangement. Populate with U (upside risk only) if the provider does not assume risk and the fee-for-service equivalent for services rendered is guaranteed. Populate with N/A if the arrangement does not cover medical services.

Involves measurement of drug utilization or spending targets (AC012): Populate with 'Y' if providers are evaluated against pharmacy spending goals or a budget. Provider Type (AC013): Populate with the appropriate provider type for the contract type. Options

include Primary Care Provider (PC), Behavioral Health Provider (BH), or OT (Other Provider). If a

contract type is arranged with multiple provider types, then list each. For example, if a payer has a particular Pay-for-Performance contract set up with Primary Care providers and Behavioral Health providers where fields AC003 – AC012 apply consistently, submit "PC, BH" in AC013.

Assigned LAN Category (AC014): Populate with the appropriate LAN categorization (see look up table B.1.J). All LAN categories that are submitted in the APM and CT files should be represented in the Contract Supplement.

The APM Contract file should be submitting using the APM Contract filing template found here. Please direct any questions about this file to CIVHC.

APM File

| Data Element # | Data Element Name | Туре | Length | Description/Codes/Sources | Required |
|----------------------|----------------------|---------|--------|---------------------------|----------|
| AM001 | Payer Code | Varchar | 4 | Distributed by CIVHC | R |

| Data Element # | Data Element Name | Туре | Length | Description/Codes/Sources | Required |
|----------------------|---|---------|--------|---|----------|
| AM002 | Billing Provider Number | Varchar | 30 | Payer assigned billing provider number. This number should be the identifier used by the payer for internal identification purposes, and does not routinely change. This number should align with billing provider numbers in the MC file. | R |
| AM003 | National Billing Provider ID | Varchar | 20 | National Provider ID | R |
| AM004 | Billing Provider Tax ID | Varchar | 9 | Tax ID of billing provider. Do not code punctuation. | R |
| AM005 | Billing Provider Last Name or Organization Name | Varchar | 128 | Full name of provider billing organization or last name of individual billing provider. | R |
| AM006 | Billing Provider Entity | Char | Ι | F = Facility G = Provider group I = IPA P = Practitioner | R |
| AM007 | Payment Arrangement Category | varchar | 2 | See look up table B.I.J Payment arrangement type reported. If there is more than one payment arrangement type with a billing provider/organization, then separately report each payment arrangement type. | R |
| AM008A | Prospective Payment Flag | Char | Ι | Y = Payment to provider for services was made prospectively; populate field with 'Y' even when retrospective reconciliation is part of contract N = Payment to provider for services was not made prospectively | R |
| AM009 | Performance Year | Year | 4 | Effective year of performance period for reported Insurance Product Type Code and Payment Arrangement Type. CCYY format | R |
| AM010 | Insurance Product Type Code | char | 2 | See lookup table B.I.A | R |

| Data Element # | Data Element Name | Туре | Length | Description/Codes/Sources | Required |
|----------------------|---|---------|--------|---|----------|
| AMOTI | Member Months | Int | 12 | Total number of members in reported stratification attributed to given billing provider that participate in the reported payment arrangement in given year, expressed in months of membership No decimal places; round to nearest integer. Example: 12345 | R |
| AM012 | Total Primary Care Claims Payments | numeric | 15 | Sum of all associated claims payments, including patient cost- sharing amounts that pertain to primary care. Primary Care Services are to be identified based on the definition provided in table B.I.K. Two explicit decimal places (e.g., 200.00). Enter negative number if the billing provider or organization has to pay the mandatory reporter. Enter 0 if no primary care claims payments made. This value should never exceed the amount of Total Claims Payments (AM012). | R |
| AM013 | Payer Portion: Total Primary Care Claims Payments | numeric | 15 | Payer portion of total primary care payments tied to a claim reported in AM010. Exclude member portion (copay, coinsurance, deductible). Should be a sub-set of AM010. Two explicit decimal places (e.g., 200.00). Enter negative number if the billing provider or organization has to pay the mandatory reporter. Enter 0 if no primary care claims payments made by payer. | R |
| AM014 | Total Primary Care Non-Claims Payments | numeric | 15 | Sum of all associated non-claims payments that pertain to primary care. Primary Care Services are to be identified based on the definition provided in table B.I.K. Amount reported should be net of any provider recoupments. | R |

| Data Element # | Data Element Name | Туре | Length | Description/Codes/Sources | Required |
|----------------------|--|---------|--------|---|----------|
| | | | | Two explicit decimal places (e.g., 200.00). Enter negative number if the billing provider or organization has to pay the mandatory reporter. Enter 0 if no primary care non-claims payments made. This value should never exceed the amount of Total Non- Claims Payments (AM013). | |
| AM015 | Payer Portion: Total Primary Care Non- Claims Payments | numeric | 15 | Payer portion of Total Primary Care Non-Claims Payments reported in AM011. Exclude member portion (copay, coinsurance, deductible). Should be a sub-set of AM011. Amount reported should be net of any provider recoupments. Two explicit decimal places (e.g., 200.00). Enter negative number if the billing provider or organization has to pay the mandatory reporter. Enter 0 if no primary care non-claims payments made by payer. | R |
| AM016 | Total Claims Payments | numeric | 15 | Sum of all associated claims payments, including patient cost- sharing amounts. Two explicit decimal places (e.g., 200.00). Enter negative number if the billing provider or organization has to pay the mandatory reporter. Enter 0 if no claims payments made | R |
| AM017 | Payer Portion: Total Claims Payments | numeric | 15 | Payer portion of total payments tied to a claim reported in AM012. Exclude member portion (copay, coinsurance, deductible). Should be a sub-set of AM012. Two explicit decimal places (e.g., 200.00). Enter negative number if the billing provider or organization has to pay the mandatory reporter. Enter 0 if no claims payments made by payer. | R |

| Data Element # | Data Element Name | Туре | Length | Description/Codes/Sources | Required |
|----------------------|--|---------|--------|--|----------------|
| AM018 | Total Non-Claims Payments | numeric | 15 | Sum of all associated non-claims payments. Two explicit decimal places (e.g., 200.00). Enter negative number if the billing provider or organization has to pay the mandatory reporter. Enter 0 if no non- claims payments made Amount reported should be net of any provider recoupments. | R |
| AM019 | Payer Portion: Total Non-Claims Payments | numeric | 15 | Payer portion of Total Non-Claims Payments reported in AM013. Exclude member portion (copay, coinsurance, deductible). Should be a sub-set of AM013. Amount reported should be net of any provider recoupments. Two explicit decimal places (e.g., 200.00). Enter negative number if the billing provider or organization has to pay the mandatory reporter. Enter 0 if no non-claims payments made by payer. | R |
| AM020 | Recoupments from Provider | Numeric | 15 | Any funds that were refunded to carrier from provider as a result of missed quality metrics, missed spending targets, or APM reconciliation payments. Do not report claim reversals or any other recoupments that occurred as a result of accounting errors. | R |
| AM021 | Billing Provider Office City | varchar | 30 | Physical address - Name of City | R |
| AM022 | Billing Provider Office State | char | 2 | Physical address - Name of state. Use postal service standard 2 letter abbreviations. | R |
| AM023 | Billing Provider Office Zip | varchar | 11 | Physical Address – minimum 5-digit zip code. | R |
| AM024 | RAE Indicator | Char | 2 | Identify which Medicaid Regional Accountable Entity the provider is associated with 1 = RAE Region 1 2 = RAE Region 2 | R for all RAEs |

| Data Element # | Data Element Name | Туре | Length | Description/Codes/Sources | Required |

Appendix A: Waiver Instructions and Form

VALUE IN HEALTH CARE

INSTRUCTIONS TO REQUEST A DATA SUBMISSION WAIVER for the COLORADO ALL PAYER CLAIMS DATABASE – APM AND DRUG REBATE FILES

CIVHC will work collaboratively with APCD data submitters to ensure that required submissions achieve the intent of the rules. These rules have been put in place to deliver a high quality, reliable source of health care data for Colorado. The APCD Program will engage in a Continuous Quality Improvement (CQI) process intended to achieve ever higher levels of data quality and completeness as the APCD Program evolves.

Consistent with the CQI process, the APCD will consider requests from data submitters to provide file exemptions for their Alternative Payment Model (APM) and Drug Rebate files. This policy is intended to recognize the special circumstances for each payer (see section 4 of the Data Submission Manuals) and document their exempt status for APM or Drug Rebate submissions.

Data submitters may request a one-year waiver from submitting required file types.

For waivers of a particular file type:

- The year for which the file exemption is requested.
- The file type for which the exemption is requested.
- An explanation as to why the data submitter is unable to submit the file.
- An original signed certification by the organization's Chief Information Officer or Regulatory Compliance Office that includes the above information and asserts that the data submitter cannot meet the requirements because the requested information is not available and cannot be derived from the data submitter's information systems.

A template for the request for waiver is attached for your convenience. Please attach additional pages of narrative as needed to provide a full explanation of the reasons your organization cannot comply. Please submit all documentation electronically to **submissions@civhc.org**. Questions may also be directed to **submissions@civhc.org**.

*Please note, this section will be updated with instructions on how to submit waivers via the Portal. Submitters may elect to submit waivers via instructions above, or via Portal for the 2023 Annual Submissions by July 1, 2023.

Colorado APCD Data Waiver Submission Request for [Year]:_____

| Name of Submitter: | Date Submitted: |

Appendix D: Sample of Completed APM Contract File

| ⊿ A | В | С | D | E | F | G | Н | | J | K | L | M | N | 0 |
|---------------|---------------------------------|--|--|--|--|--|---|---|-------------|--|---|----------------------|-----------------------------|---|
| AC001 | AC002 | AC003 | AC004 | AC005 | AC006 | AC007 | AC008 | AC009 | AC010 | AC011 | AC012 | AC013 | AC014 | AC015 |
| Payer Code | | Contract Type Name | Contract Description Description of the alternative payment model contract 3-5 sentances describing the nature of the contract including a summary of services provided, provider reimbursement method, and any other important details related to the purpose and structure of the contract | Involves both claims and non- claims C = claims only N = non-claims only B = both claims and non-claims | Services Covered N = non-medical activities only S = specific set of medical services M = comprehensive medical services | Involves measure ment of quality (Y/N) | Involves measurement of spending targets (Y/N) | Payments are prospective or retrospective PR = prospective w// retrospective PN = prospective w//o retrospective w//o retrospective reconciliation RT = retrospective N/A = not applicable | population- | Risk to Provider U = upside only D = downside only B = both upside and downside N/A = not applicable | Payment model involves quality measurement of drug utilization or spending (Y/N) | PC = Primary Care | Assigned LAN Category | Comments |
| 0000 | Example Insurance Company | HIT Payments Program | Program provides payments to practices that sign up to modernize their software. After providers sign up, there is a one- time payment issued for software developments. | N | N | I N | N | N/A | N | N/A | N | PC, BH, OT | 2A | |
| 0000 | Example Insurance Company | Patient Centered Medical Home | The practice receives a monthly PMPM infrastructure payment in order to provide additional services such as care coordination and health education. Clinical services provided by PCMH practices are reimbursed solely on a fee-for-service basis. | N | N | I N | N | PN | Y | N/A | N | PC | 2A | |
| 0000 | Example Insurance Company | Bonus Incentive Program | Program incentivizes primary care doctors to hit certain quality measures. Quality measures include decreasing avoidable ED visits. Provider receives an additional quarterly PMPM bonus payment on top of FFS payments if targets are hit. | | M | ı v | N | RT | Y | N/A | N | PC, BH | 2C | Note that AC005 is submitted as '8' becauss this arrangement includes both the nor claims bonus payments and the claim payments used to evaluate performance Corresponding 2C records should includ both claims and non-claims payments in th APM/CT file |
| 0000 | Example Insurance Company | Shared Savings Program | | | M | Y | Ŷ | RT | Y | U | N | от | ЗA | |
| 0000 | Example Insurance Company | Musculoskeletal Capitation Program | Program provides PMPM payments to physician practices for treatment of musculoskeletal disorders in lieu of FS payments. Provider has the responsibility of staying within the budget provided with the PMPM payments. Providers are required to meet certain quality benchmarks, including selected HEDIS measures, to continue to participate in the program. | N | S | ; Y | Ŷ | PR | Ŷ | В | N | στ | 48 | |
| 0000 | Example Insurance Company | Primary Care Capitation Program | A primary care provider receives a capitation payment for all primary care services for its attributed members. There is no link to quality in the payment model. | N | s | i N | N | PN | Y | в | N | PC | 4N | |

Appendix E: Control Total Member Months Reporting

| | Values are unique to Performance Values are unique to Performance Year + IPT Code Year + IPT Code + Payment and consistent across all rows | | | | | |
|---------------------|--|---------------------------------|---|----------------------|--|---|
| | | | Research Question: What % of members received care under a specific arrangement category? | Denominator | <u>Research Question:</u> What % of members received care under any alternative arrangement? | |
| СТ004 | СТ005 | СТ006 | СТ007 | СТ008 | СТ009 | |
| Performance Year | Insurance Product Type Code | Payment Arrangement Category | Payment Arrangement Category Member Months | All Member Months | Total Alternative Arrangement Member Months | |
| 2019 | НМ | 01 | 0 | 12,875,396 | 5,513,496 | Note: CT009 will typically be less than the sum of CT007 members that are attributed to |
| 2019 | НМ | 4A | 235,613 | 12,875,396 | 5,513,496 | |
| 2019 | HM | 4B | 5,369,485 | 12,875,396 | 5,513,496 | |
| 2019 | 16 | 01 | 0 | 2,397,847 | 20,489 | Note: CT009 should be populated for FFS (LAN category 1) rows. |
| 2019 | 16 | 3В | 20,489 | 2,397,847 | 20,489 | We would also expect that CT009 to be less than CT008. |
| 2019 | 12 | 01 | 0 | 60,981 | 0 | Note: If no members under a specific IPT code are attributed to an alternative arrangement model then CT009 will be zero. |

| Code | Value | Definition/Example |
|------|---|---|
| 01 | Fee for Service | Payments made on a traditional fee-for-service model, no link to quality and value. These are traditional FFS payments that are not adjusted to account for infrastructure investments, provider reporting of quality data, for provider performance on cost and quality metrics. Diagnosis-related groups (DRGs) that are not linked to quality are in Category I. |
| | Foundational Payments | Payments for infrastructure investments that can improve the quality of patient care. (e.g., payments designated for |
| 2A | for Infrastructure and Operations | staffing a care coordination nurse or upgrading to electronic health records). |
| 2B | Pay for Reporting | Payments (incentives or penalties) to report quality measurement results |
| 2C | Pay-for-Performance | Payments (incentives or penalties) based on performance in meeting goals for quality measures (e.g. bonuses for quality performance) |
| 3A | APMs with Shared Savings | Payments representing a share of the savings generated when a cost or utilization target is met and if quality targets are met. Does not include penalties when cost or utilization targets are not met. (e.g., shared savings with upside risk only) |
| 3B | APMs with Shared Savings and Downside Risk | Payments representing a share of the savings generated when a cost or utilization target is met and if quality targets are met. Includes penalties representing a portion of the losses that result when a cost or utilization target is not met. (e.g., episode-based payments for procedures and comprehensive payments with upside and downside risk) |
| 3N | Risk Based Payments NOT Linked to Quality | Payments representing a share of savings generated when a cost or utilization target is met and no quality targets exist (e.g., episode-based payments for procedures without quality measures and targets) |
| 4A | Condition-Specific Population-Based Payment | Payments for the comprehensive treatment of specific conditions (e.g., payments for specialty services, such as oncology or mental health). Bundled payments for cancer care fall under Category 4A if providers are responsible for the total cost and quality of care for a patient, rather than covering only chemotherapy payments. Also, payments that are prospective and population-based and cover all care delivered by particular types of clinicians (e.g., orthopedics). |
| 4B | Comprehensive Population-Based Payment | Payments that are prospective and population-based, and cover all an individual's health care needs. Category 4B encompasses a broad range of financing and delivery system arrangements, in which payers and providers are organizationally distinct, (e.g. global budgets or full/percent of premium payments) |
| 4C | Integrated Finance and Delivery System | Payments that also cover comprehensive care, but unlike Category 4B payments, they move from the financing arm to the delivery arm of the same, highly integrated finance and delivery organization. In some cases, these integrated arrangements consist of insurance companies that own provider networks, while in other cases they consist of delivery systems that offer their own insurance products (e.g. global budgets or full/percent of premium payments in integrated systems) |
| 4N | Capitated Payments NOT Linked to Quality | Payments that are prospective and population-based, but not linked to quality. |

Appendix H: Frequently Asked Questions

I) When is each file due?

Test files for Alternative Payment Models, Drug Rebate and Control Totals are due by July 17, 2023. Test files should include data for calendar year 2020.

Final production files are due by September 1, 2023. Production files must be submitted with data for three previous calendar years – 2020, 2021, 2022.

2) How should the files be submitted and named?

Files should be submitted in Excel format (.xlsx, .xls, or .csv) or text format (.txt) through the SFTP server. Naming conventions should follow the template:

TESTorPROD_PayerID_SubmissionYearDueFileTypeVersionNumber.FileExtension

Naming conventions should follow the template: TESTorPROD_PayerID_SubmissionYearDueFileTypeVersionNumber.FileExtension

For example, the following naming conventions will be used for testing and production in 2023: TEST_0000_2023AMv01.txt PROD_0000_2023CTv02.txt TEST_0000_2023CTv01.xlsx PROD_0000_2023AMv02.xlsx

3) What is the objective of the Alternative Payment Model (APM) files?

The overarching goal of the APM file is to gain a better understanding of how payments to providers in Colorado are shifting from traditional fee-for-service (FFS) to alternative payment models that pay incentives to providers for delivering high quality, cost-effective care.

There are a growing number and variety of APMs being tested and we currently lack the ability to track spending and the number of patients receiving care under these models. Including data on APMs in the CO APCD would enable researchers, policy makers, health plans, providers and other stakeholders to establish baseline information regarding current spending levels and the number of patients receiving care under APMs (vs. traditional FFS) and track changes over time. This information may also help to identify the types of APMs that are most effective in reducing costs and improving quality, informing the development of policy solutions to improve the value of health care.

The APM file captures detailed information about each provider and the dollars the provider receives under each payment model.

4) What is the objective of the Control Total (CT) files?

The Control Total file supplements the APM file by collecting summary information about the distribution of payments under various payment models. It is used to confirm that the APM file from each submitter was received and loaded correctly. It is also used to understand the adoption of APMs by line of business (e.g., Commercial, Medicaid, Medicare Advantage) in Colorado via de-duplicated member months.

5) What is the objective of the Contract Information Supplement?

The goal of collecting the supplemental contract information is to facilitate discussions with payers about their alternative payment model contracts with providers. Each of the data elements represent a question that CIVHC consistently asked payers related to each payment model when assisting them with categorizing payments into the Health Care Payment Learning and Action Network (HCP LAN) framework. The addition of the supplemental contract information will standardize and streamline this effort. CIVHC does not intend to share this information publicly.

6) What level of granularity should be included in the Contract Information Supplement?

The supplement should include an entry for each type of contract represented in the APM and Control Total files (e.g. episode-based payments for orthopedic procedures or mental health-specific population-based payments). There does not need to be an entry for each individual provider contract. Contracts that are entirely fee-for-service also do not need to be included.

7) My organization submits claims data under multiple CIVHC-assigned payer codes. How should I handle this?

For the APM and Control Total files, please submit separate files for each payer code. If you are unable to report these data by payer code, please contact CIVHC. We will work with you to develop modified data specifications that accommodate your data limitations and allow CIVHC to fulfill its statutory obligations. Please note that these instructions for the APM file differ from instructions related to the Drug Rebate file.

8) What is the timeframe of the payments included in the APM and Control Total files?

These files require information for each of the three most recent calendar years (2020, 2021 and 2022). The year (AM009, CT004) should be assigned based on service or incurred date rather than paid date. Include all payments made on or before June 30, 2023.

When contracts fall partly outside of the submission period ("performance period") and payments cannot be exclusively attributed to the submission period, please contact CIVHC to discuss the method of reporting these data.

9) What is the process for requesting waivers and exceptions to the APM file submission requirements?

Please complete the form on page two of Appendix A, "Data Submission Waiver Instructions - APM and Drug Rebate Files" and email it to <u>submissions@civhc.org</u>. CIVHC will review the document and provide comments, if necessary. CIVHC will then complete the Data Submission Waiver Agreement and combine this with the completed file submitted by your organization. CIVHC will provide this document to you for your records.

Please submit these waiver documents no later than July 1, 2023.

*Please note, this section will be updated with instructions on how to submit waivers via the Portal. Submitters may elect to submit waivers via the current method, or via Portal for the 2023 Annual Submissions.

10) Will you be joining these files to the other claims files (MC, PC, ME, MP) that we submit to the APCD?

No, we will not join these files to the data in the APCD. CIVHC understands that the data collected in the APM file are based on different inclusion criteria than the data in the APCD files, so it is not expected that the numbers will be equal. However, we will compare the paid amounts and member months in these files to ensure the numbers are in the same ball park.

II) Who is obligated to submit the APM and Control Total files?

Payers that submit data to the CO APCD and reimburse providers under any Alternative Payment model are required to submit APM and Control Total files.

12) What level of reporting is required for the APM files?

All payments to billing providers and large provider organizations (e.g., IPAs) must be reflected only once such that the sum of your organization's payments to a single entity accurately reflects the total payments made to that entity spanning that performance period.

13) What are the differences between the data reported in the APM files and the data reported in the other claims files (eligibility, claims, provider, etc.)?

One difference between the aggregated data reported in the APM files and the claim-level data reported in the monthly claims files is the inclusion of data for Substance Use Disorder (SUD). Monthly claims files do not include SUD claims but data submitters should include SUD data in APM filings of aggregated claims and non-claims payments.

Another difference is the inclusion of non-claims payments in the APM files; one of the main purposes of the APM file is to understand the total payments (claims and non-claims payments) to providers for care delivered to residents of Colorado. Monthly claims files do not capture most non-claims payments.

14) How should member months (AM011) be calculated?

Population of the member months field (AM011) is only required when reporting certain types of payment arrangements such as population-based payments. When required, your organization should include the total number of members (represented in member months) that participated in the reported APM. This will require identifying the number of members (monthly) served under the payment arrangement model for each billing provider or contract ID. For example, a comprehensive population-based payment (Payment Model = 4B) paid for a member for January through December would count as 12-member months. If your organization covers a person for even one day of the month, even if it's the 1st or the 31st, then this counts as a member month.

CIVHC understands that a given member could be reflected across multiple billing providers. For example, if the same individual received services from multiple providers in the same reporting period, all of whom received non-claims payments, then the membership should be reflected in each row corresponding to the member's providers.

15) Should we be reporting information (NPI, tax ID, entity type) for the entity/organization a payment is actually sent to or the providers within that organization that receive the payment? For example, if a large payment is sent to the financial parent of a health system, should we report what is sent to the financial parent, or should we figure out how the financial parent distributed this payment to its providers?

Payers should provide the most granular payment data available. In the example given where the financial parent receives a large payment for all of their providers, your organization shall provide detailed information about how that financial parent disbursed the large payment to the various provider groups it contains. If you are unable to achieve this level or granularity, please contact CIVHC.

CIVHC desires a unique ID for each recipient of these funds. The typical unique ID is the billing provider ID, but we understand that there are certain instances where this level of granularity is unavailable. If this is the case for your organization, please notify CIVHC. We will work with you to develop modified data specifications that accommodate your limitations and allow CIVHC to fulfill its statutory obligations.

16) What if a single payment under a Billing Provider ID consists of several different components? For example, what if a payment includes a FFS portion plus a bonus payment for meeting performance and quality goals?

In instances when a single contract consists of several components (but is paid out in a single check), your organization should separate these payment types and report them in separate fields on a single AM file record. In the above example, this arrangement might be considered pay-for-performance. Your organization would report 2C (Pay for Performance model) in AM007, the amount of the payment that was FFS in the claims payments fields (AM012, AM013, AM016, and AM017), and the amount that was a pay-for-performance bonus in the non-claims payments fields (AM014, AM015, AM018, and AM019).

If your organization has a contract that is based on FFS and includes shared savings or shared savings with a downside risk, the payer would report the amount of FFS payments in the claims payments fields (AM012, AM013, AM016, and AM017), and the amount for any shared savings or shared savings with downside risk payments in the non-claims payments fields (AM014, AM015, AM018, and AM019). Both claims and non-claims dollars would be reported on a single AM file record with the appropriate LAN categorization in AM007.

17) How are the different "payment" variables (AM012-AM020) defined?

There are nine payment variables in the APM file in four major categories; two categories that relate to primary care payments, two that relate to total payments, and one that relates to recoupments from providers. The two total primary care payment elements (AM012 and AM013) should be subsets of the total payment elements (AM014 and AM015), respectively. Total Primary Care Claims Payments (AM012) should be a subset of the value input for Total Claims Payments (AM014) and Total Primary Care Non-Claims Payments (AM014) should be a subset of the value input for Total Claims Payments (AM018).

Each Total payment field also has a corresponding Payer Portion amount field (AM013, AM015, AM017, AM019). The Payer Portion should always be a subset of the Total payment amount.

Total Claims payments fields (AM012and AM016) should include payments that were directly tied to a claim. These transactions would be found in the Medical Claims (MC) files submitted to CIVHC each month. It should include the total allowed amount -- member portion (copay + coinsurance + deductible) plus the plan paid portion.

Total Non-claims payments fields (AM014 and AM018) should include payments made outside of the claim transaction. This would include transactions such as incentive payments, capitation payments, payments for infrastructure, and any payments from the provider to the payer (i.e., penalties) in downside risk arrangements.

Recoupments from Providers (AM020) is meant to capture the total payments received from providers to payers as a result of missed quality metrics, missed spending targets, or APM reconciliation payments.

18) How is the Prospective Payment Flag defined?

Prospective payments refer to any payments made to providers in advance of services rendered. Typically, these are based on predetermined payment amounts for services.

Payments associated with contracts that include prospective payments for series should be submitted with a Prospective Payment Flag (AM008) = 'Y'. This flag should be set to 'Y' even if retrospective reconciliation is also part of the payment contract.

Payments associated with contracts that do not include any prospective payments should be submitted with AM008 = N'.

Please direct any specific questions to CIVHC.

19) When would a negative or zero-dollar payment be reported?

Negative payments should be reported when your organization receives money from a contracted entity, as opposed to paying money out. For example, a payment a contracted entity makes to your organization under a shared risk payment arrangement.

There may also be instances in which your organization should enter \$0 for a given payment to convey important details about that contract. For example, if your organization has a shared savings arrangement with a FFS base but at the end of the contract period the provider did not achieve the threshold necessary to receive shared savings payments, you should enter the payment amounts for FFS and enter \$0 in another row for Alternative Payment Models with shared savings (code 3A). This conveys that your organization had a shared savings payment arrangement with the provider, instead of a traditional FFS arrangement, but that the threshold for the Shared Savings payment was not met.

20) What should be reported in instances when a certain billing provider ID does not have any alternative payment model contracts? For example, what if a provider only receives payments under an FFS arrangement? How should we report the total payments made to this provider?

The APM file is meant to capture all payments, not just alternative payments. For example, both fee-forservice and alternative payment methodologies are included in the APM file as required payment models for reporting. Therefore, if the only payment made to one or more Billing Provider IDs was under a FFS arrangement, then the claims payments fields (AM012 and AM016) should be populated with the payment amounts and non-claims payments fields (AM014 and AM118) should reflect \$0. Only in instances where there is no payment at all made to a particular billing provider or organization for contracts during the reporting period should they be omitted from the APM file.

21) What is the definition of primary care for reporting element AM012 (claims)?

CIVHC is using the definition established by the Colorado Primary Care Payment Reform Collaborative. This definition was operationalized as payments made to a primary care provider for a primary care service. Included in this definition are services delivered by behavioral health providers who practice in an integrated primary care setting.

The primary care definition consists of two components that should be summed to produce total primary care payments:

- A. <u>Outpatient services delivered by primary care providers</u> (which includes OB/GYN providers), defined by a combination of primary care provider taxonomy and primary care CPT-4 procedure codes
- B. <u>Outpatient services delivered by behavioral health providers, nurse practitioners and physician</u> <u>assistants</u>, defined by a combination of the "other" provider taxonomy and primary care CPT-4 procedure codes AND billed by a primary care provider (defined by primary care taxonomy)

Please refer to Appendix F for the taxonomy and CPT-4 procedure code sets relevant to the definition above. To assist you in calculating primary care payments from claims, CIVHC will provide SQL code that you can use as the basis for extracting these data from your systems. As always, please contact CIVHC if you have questions about how to implement the new definition of primary care.

22) What is the definition of primary care for reporting element AM014 (non-claims)?

Include non-claims-based payments for services delivered by:

- Providers with specialties in the primary care taxonomy (Appendix F, Table I)
- Behavioral health providers with a specified taxonomy (Appendix F, Table 2) that deliver care that is integrated with primary care (i.e., either within the primary care practice or through working relationships that involve close communication and collaboration with primary care providers)
- Payments to Nurse Practitioners and Physician Assistants (Appendix F, Table 2) that deliver primary care or work within a primary care practice

Please reach out to CIVHC if your organization is unable to identify specific service providers within a large contract and need assistance allocating or estimating non-claims primary care expenditures.

23) What should be included in Record Type (AM999)?

Please populate each record in the APM file with "AM". This is for administrative purposes.

24) What should be included in Record Type (CT999)?

Please populate each record in the Control Total file with "CT". This is for administrative purposes.

25) How do I know if my files have been accepted and passed the validation process?

Although you receive automated confirmation emails when you submit monthly files, you will not receive an automated email after submitting your annual APM and Control Total files. If your files have not been received in the correct folder by the due date, a representative from CIVHC will send an email requesting immediate submission.

After CIVHC has conducted a check of the validity of the data in your files against the data in the CO APCD, you will receive an email with a list of questions about your file. After all questions have been answered and remaining issues have been resolved, CIVHC will notify you by email.

Appendix I: SFTP Submission Instructions CO APCD New File Types Submitter Instructions

Files should be submitted in Excel format (.xlsx, .xls, or .csv) or text format (.txt) through the SFTP server.

I. File Transmission

Data submissions will be made via SFTP. Each submitting entity should have an existing SFTP connection with NORC at the University of Chicago to submit other data types to the Colorado APCD. Payers should coordinate internally to share the existing connection information. All files transferred via SFTP will be automatically linked to the payer's account based on the file name. It is important that the files be named per a standard naming convention outlined in CIVHC's Data Submission Guide to ensure that the file type and submission periods can properly be discerned.

Many tools exist for Secure File Transfer Protocol. FileZilla and WinSCP are two examples. Please refer to your program's documentation for help with setup, if needed.

Connection Information for the SFTP Server:

- Server Name: transfer.norc.org
- User: the account name issued via secure download
- Password: the SFTP password issued via secure download
- Annual Test files in .txt format (AM, CT)
 - [root]/incoming/AnnTxtProdPortal
- Annual Test files in .xlsx format (AC)
 - o [root]/incoming/AnnExcelProdPortal
- Annual Prod files in .txt format (AM, CT)
 - [root]/incoming/AnnTxtProdPortal
 - Annual Prod files in .xlsx format (AC)
 - o [root]/incoming/AnnExcelProdPortal

You will NOT receive an automated email notification once the file has been received. If you have questions about whether your file has been received please contact the Help Desk (<u>civhchelp@hsri.org</u>).

2. File Format

Files should be submitted in Excel format (.xlsx, .xls, or .csv) or .txt through the SFTP server. These files contain sensitive data and therefore are required to be compressed and encrypted. If your organization requires the encryption of files before transmission you can do so with a commercially available, payer-approved file compression and encryption software such as WinZip or 7-Zip. Files should be compressed and encrypted in 256-bit AES. The password can be obtained through the CO APCD Portal. If you do not have access to the portal please coordinate internally at your organization to obtain this information. PGP encryption will not be supported for these file types.

Appendix J: CO APCD Data Submission Guide Version 14 Testing Instructions Last Updated: April 26, 2023

Introduction

This document contains your instructions to begin testing MP, ME, MC, and PC files in the data submission guide version 14 format for the Colorado APCD.

Data Submission Guide Version 14 Overall Implementation Timeline

| DSG 14 Timeline | | | |
|---|----------------------------|--|--|
| Task | Due Date | | |
| Payer Connect Calls | Bimonthly | | |
| Request for DSG feedback (monthly and annual files) | Ongoing | | |
| Initial Payer feedback due | 8/1/2022 | | |
| CIVHC distribute updated DSG 14 draft based on stakeholder feedback | 8/31/2022 | | |
| CIVHC File Rule Packet with HCPF | 10/7/2022 | | |
| Public Review Meeting | 11/8/2022 | | |
| Executive Director Hearing | 11/29/2022 | | |
| Rule Effective | 1/30/2023 | | |
| Annual Override Reset | 2/28/2023 | | |
| Monthly Data Files (ME, MC, PC, MP) Testing and Implementation | | | |
| Submitter testing of DSG v14 in Test Portal | May – June 2023 | | |
| April 2023 due in DSG v13 in Production Portal | 6/1/2023 | | |
| April 2023 Submissions Must be in a Status of Validation Passed | 6/15/2023 | | |
| At least one BETA test file submitted to Test Portal | 6/16/2023 | | |
| DSG v14 Production Portal Go Live. Submitted files will be held and processed on 6/27/2023 | 6/23/2023 - 6/26/2023 | | |
| May 2023 Submissions Due in DSG v14 – no less than 120 days after Rule Effective Date | 7/3/2023 | | |
| May 2023 Submissions Must be in a Status of Validation Passed | 7/17/2023 | | |
| Annual Data File (AM, CT, DR, AC, VB, PD, PB) Testing and Ir | nplementation | | |
| Test files with 2020, 2021, 2022 data due | 7/17/2023 | | |
| Production files with 2020 – 2022 data due | 9/1/2023 | | |
| PLEASE NOTE: If you are onboarding to the CO APCD follow the timeline disc | ussed with CIVHC and HSRI. | | |
| Timeline updated 12/16/2022 | | | |

Testing Requirements

5/29/2023 - 6/26/2023

- Transmit properly named, compressed, and encrypted files via SFTP to the appropriate directory (see details below).
 - Submit at least one of each expected ME, MC, PC, MP file type for January 2023 paid dates by June 16^{th.}
 - During this testing period you have the opportunity to test annual file submissions, however, test files are not required to be submitted and passing all intake validations until July 17th.
- Review all validation results and resolve all structural and failure-level validation issues by resubmission.

Please note we have made updates to the Test SFTP folder directories:

- Monthly Claims Test Files (ME, MC, PC, MP) should be transmitted to: [root]/incoming/MthlyTestPortal
- Annual Files in .txt format (AM, CT, DR) should be transmitted to: [root]/incoming/AnnTxtProdPortal
- Annual Files in .xlsx format (VB, AC, PB, PD) should be transmitted to: root]/incoming/AnnExcelProdPortal

Overview of Testing Steps

- 1. **Prepare January 2023 files in DSG v14 Format:** Properly name files "TEST" according to the file naming convention outlined in DSG v14. Submit each file type typically required to submit.
- 2. **Compression and Encryption of File(s):** Compress and encrypt your data files using the same method as used in production (256-bit AES or PGP).
- 3. Transfer of Compressed and Encrypted File(s) via SFTP: Transfer the compressed and encrypted files via the SFTP server transfer.norc.org. <u>See above details</u> for new test folder <u>directories</u>.
- Portal Login: Login to the CO APCD Test Portal: <u>https://coapcd-test.norc.org</u>. All production portal (<u>https://coapcd.norc.org</u>) user account credentials have been copied to the test portal for use. If you do not have an account or have issues logging into the Test Portal, please contact the Help Desk (<u>civhchelp@hsri.org</u>).
- 5. **Review and Resolve Validation Issues:** After receiving a notification email, login and review validation issues. Resolve structural and failure-level validation issues.

Step 1: Prepare January 2023 files in DSG v14 Format.

Payers must submit each file type typically required.

Name monthly claims files according to the file naming convention outlined in DSG v14:

TEST_PayerID_PeriodEndingDateFileTypeVersionNumber.txt

- TEST: "TEST" for test files
- Payer ID: This is the four-digit payer ID assigned to each submitter
- Period Ending Date: Expressed as CCYYMM (Ex: 202301 indicates a January 2023 end date).

- File Type: Member Eligibility (ME), Medical Claims (MC), Pharmacy Claims (PC), Provider (MP)
- Version number: This is used to differentiate multiple submissions of the same file. This will be
 important if a file needs to be resubmitted to resolve an issue such as a validation failure. The
 letter "v" should be used, followed by two digits, starting with v01. You must include the leading
 zero. Original submissions of all files should be labeled v01. The Portal will not accept files that
 have the same name as an existing file.
- File extension (.txt)
- Example: TEST_0000_202301MEv01.txt

Name **annual files** according to the file naming convention outlined in DSG v14:

 $TEST_PayerID_SubmissionYearDueFileTypeVersionNumber.txt$

- TEST: "TEST" for test files
- Payer ID: This is the four-digit payer ID assigned to each submitter
- Submission year due, expressed as CCYY (four-digit calendar year).
- File Type APM File (AM), Control Total (CT), APM Contract Supplement (AC), Drug Rebate (DR), PBM Contract Supplement (PB), PDAB (PD), Value Based Purchasing Contract (VB)
- Version number: Used to differentiate multiple submissions of the same file. This is important when a file must be resubmitted to resolve an issue, such as a validation failure. The letter v should be used, followed by two digits, starting with v01. Please include the leading zero. Original submissions of all files should be labeled v01. The Portal will not accept files that have the same name as an existing file.
- File extension (.xlsx for PD, PB, AC and VB files, .txt for AM, CT, and DR files)
- Example: TEST_0000_2020AMv01.txt

Step 2: Compression and Encryption of File(s)

Data Preparation

To ensure the security of personally identifiable information and personal health information, and to reduce file transmission times, we require submitters to compress and encrypt all files before submission. Compress and encrypt your data files using the same method as used in production (256-bit AES or PGP).

Step 3: Transfer of Compressed and Encrypted File(s) via SFTP

Data submissions will be made via SFTP.

All files transferred via SFTP will be automatically associated with the submitter account based on the file name. It is important that the files be named per the standard naming convention outlined in CIVHC's Data Submission Guide Version 14 to ensure that the file type and submission periods can properly be discerned.

Please note we have made updates to the Test SFTP folder directories:

 Monthly Claims Test Files (ME, MC, PC, MP) should be transmitted to: [root]/incoming/MthlyTestPortal

- Annual Files in .txt format (AM, CT, DR) should be transmitted to: [root]/incoming/AnnTxtProdPortal
- Annual Files in .xlsx format (VB, AC, PB, PD) should be transmitted to: [root]/incoming/AnnExcelProdPortal

Many tools exist for Secure File Transfer Protocol. FileZilla and WinSCP are two examples. Please refer to your program's documentation for help with setup, if needed.

Connection Information for the SFTP Server:

- Server Name: transfer.norc.org
- Folder Name: see above
- User: Same as production
- Password: Same as production

Step 4: Portal Login

You will receive an email notifying you of the file status once the validation is complete. At that time, login to the Test Portal to track the progress of your file. Any user who has an account with the CO APCD Production Portal will be able to use their existing username and password to login to the CO APCD Test Portal here: <u>https://coapcd-test.norc.org</u>. If you have any issues logging in, contact the CIVHC Help Desk.

Step 5: Submission Notification, Review and Resolve Validation Issues

As part of this testing period, we expect you to review the validation results and resolve structural and failure level validation issues by resubmitting a corrected file. The override functionality will be disabled for profile, ad hoc, and exemption level validation issues. Continue reading for details.

Once a file has been submitted via SFTP you will receive a notification that is has been received and is being processed. Files will then be evaluated against a set of data validations before they can proceed for further quality assurance checks. You will receive an email notifying you of the file status once the validation is complete. The validations and validation issues will all be viewable within the Test Portal. Login to the Test Portal and navigate to the **Submissions menu** to track the progress of your file. When files complete processing, they will display a Status of "Error", "Failed", or "Validation Passed".

Processing typically takes under an hour, but we guarantee it will happen within 24 hours. If your submission does not reach one of these statuses within 24 hours and/or you do not receive an email, please contact the Help Desk so that we can investigate. If the validation failed, you would then log in to the Test Portal to view details of the validation results.

Files with a "Validation Failed" status mean your file has failed one or more data intake validations. When this is the case, you will need to click on "Details" to see what the specific issues are. This will take you to a list of issues in the file.

• **Structural Level Validation Issues**: If there are issues with an Issue Type of "Structural", you will need to resolve these before moving on to other issues. Most structural issues cannot be overridden. Structural issues tend to involve file structure and formatting of fields such as too many characters or are in direct conflict with the specification in the Data Submission Guide. You can see additional information about a validation by clicking on "Details". For most structural validations, you will see a message indicating that the error needs correction in the file and will thus need resubmission.

- **Failure Level Validation Issues**: Issues of type "Failure" cannot be overridden. They typically involve an intrinsic issue with the format of the data and will need to be fixed and resubmitted.
- **Profile Level Validation Issues**: Issues of type "Profile" represent validations that vary by book of business and can be overridden with a clear explanation of why you consider the data of sufficient quality. Subsequent failures on the same validation rule will be automatically overridden for the remainder of the calendar year once a Profile override has been established.
- **Exemption Level Validation Issues**: Issues of type "Exemption" can be overridden but require approval from CIVHC. Requesting an override for these issues will require you to supply a time for which you believe you will need the exemption. All overrides are reset yearly, so if you need an exemption past December of a given year, you will need to submit a new request the following year, if your data continues to fail the validation.
- Ad Hoc Level Validation Issues: Issues of type "Ad Hoc" may be overridden without the need for CIVHC approval. However, unlike Profile overrides, Ad Hoc overrides will not persist for subsequent failures on the same validation rule such that submitters will need to provide an explanation whenever criteria for such a rule are not met.

Files with a "Validation Passed" status have passed our data intake validations.

Feedback and Questions

If you encounter any issues during testing, please contact the CIVHC Help Desk at <u>civhchelp@hsri.org</u>.
